16th December 2015.

Bradwell Site, Magnox Limited : Environmental Permit Application to discharge liquid wastes from Fuel Element Debris (FED) Dissolution (dissolving in nitric acid) : reference PR2TSE10760/V003 and EPR/DP3217XB/V002.

Dear Sir Philip,

I wrote to you on 5th October 2015 and again on 20th November because I had received no reply from you to my first letter, and I now find that my second letter is also without a response of any kind. Copies of both letters are attached.

As this matter concerns what we consider to be actions by the Environment Agency which are beyond its legal powers, I am compelled now to continue to bring this matter to your attention.

Accordingly we have sent this present letter, 16th December, to you by recorded delivery. As the Chairman of the Environment Agency I am certain you will understand why we seek your response to the concerns in question.

In the event of a continued absence of acknowledgement and a clear outline of advice from you as to what course you intend to follow in investigating this matter, we will be compelled to pursue an alternative strategy to bring this matter to your direct attention and action.

Yours sincerely

S. D. Eades
Marinet Limited.

cc. David Levy, Marinet Director and Chair.
